THE BIBLE SPEAKS

By R. L. Dalzell

"Prepare to meet thy God"—
Amos 4:12

We believe that every normal person is interested in making preparation to meet God. Preparation means the act of making ready for some special use, purpose, service, condition or goal. The necessity of preparation is seen in every walk of life. Nothing of great importance ever happened by mere chance or accident. The worthwhile achievements of civilization have been produced by careful planning and preparation.

Standardizing agencies of our nation will not certificate a person to teach in the public schools until he has completed a prescribed course of study. Likewise with those who practice medicine. The farmer first turns the sod as a means of preparing a seed-bed for his crop. Abraham Lincoln applied this principle as he once said: "I will study and prepare myself, and some day my chance will come." His opportunity did come, and because he had made preparation for it, he was elevated to the highest position of honor in this great nation.

In like manner it is necessary to prepare to meet God. According to the inspired record, the five foolish virgins had only one fault. They were not immoral harlots, lewd street walkers. So far as we know, the only thing wrong with them was that they did not make preparation in time to go in with the bridegroom to the marriage feast. Thus the door was shut against them, and the Lord answered from within: "Verily I say unto you, I know you not. Watch therefore, for ye know not the day nor the hour."—(Matt. 25:1-13). This story emphasizes the necessity of spiritual preparation, for Jesus used it to describe the kingdom of heaven.

Friends, we invite you to be with us each Sunday morning and evening. Everybody welcome at the Church of Christ in Weiser or Fruitland.

Gen. county will furnish twenty men to the armed forces this month, 10 to the Navy and 10 to the army.—Messenger.

ROUND-UP OF RATION NEWS

The War Production Board says—Arsenical insecticides for the coming summer months should be bought early, because uncertain transportation and manpower and container shortages might delay last-minute orders and result in heavy crop damage. . . . A water-resistant match, useful to servicemen in jungle areas, has been developed by match manufacturers. . . . An estimated 30,000 dozen household furnaces scoops and 55,000 dozen snow shovels will be produced in 1944, and the first of them should be available to consumers by late fall or early winter.

National headquarters of Selective Service announces that inductees no longer will be ear-marked for either the Army or the Navy after their preinduction physical examination, beginning July 1, but will be placed in the common pool to be drawn upon as the needs of the respective branches develop. . . . Shoe dealers may sell limited quantities of "od lot" shoes ration-free to consumers at specified price reductions July 10 through July 29, OPA says. . . . WFA expects that shipping will be available to import six million bushels of corn from South America during July to

aid the war food and livestock feed situation in the United States. . . . U. S. Public Health Service reports that approximately 20,000 patients have been treated for syphilis and gonorrhea and new intensive methods in more than 50 rapid treatment centers, and that penicillin is being used on a large scale in the treatment of early syphilis. . . . Home canners who have the use of a pressure canner this summer will do well to put up chicken when farmers are selling large numbers of hens that are not

laying enough to be worth their keep; the department of Agriculture advises.

Make Oil Edible

Milkweed oil, chemically similar to soybean oil, can be made edible. One hundred pounds of weeds yield 21 pounds of oil. A process for extracting oil from grape-seeds has been developed by a California professor. Salad oil is made from flax-seeds also, in fact farmers grow flax chiefly for its seed, not for fiber as it is generally believed.

I'll predict no-miles-an-hour.

I'll hand it to folks. They've had the patriotism to hold down their speed. But imagine war restrictions ended. Man, you'll see old cars overdoing till they can't chug another mile. You'll see every repair shop crowded for months, but I'm figuring to duck that! Of course, I couldn't see everything coming when I originally had this engine OIL-PLATED. I'd simply overheard that any engine forms dangerous corrosive acids. It made sense to try protecting the engine by OIL-PLATING it with Conoco Nth motor oil. I switched to Nth. You can suit yourself about thinking it's the only oil or not, but first read

the whole label. You'll see where Conoco Nth oil's special synthetic fastens OIL-PLATING to your engine's fine inside finish. Then OIL-PLATING is really sort of a special surface to block steady acid corrosion. When repairs might be just a promise, and you can only pray for a new car, you're way ahead with your engine safely OIL-PLATED by Conoco Nth.
