TIME EXTENDED FOR THE SALE OF E. BONDS IN FIFTH WAR LOAN DRIVE

Payette County Near Goal On July 8th Original Closing Date Of Bond Drive

Payette county was only \$20,850.25 short of its E bond quota of \$100,000 in the fifth war loan drive last Saturday and frantic efforts were being made to push the quota over the top as that was the original closing day when the word came that due to the fact that many counties in the state were falling short of their quotas, the time limit had been extended until July 31, according to Col. W. H. Moss, county bond chairman in a statement Wednesday.

Col. Moss is therefore calling on all members of Victory Crews in the county to redouble their efforts during the next few weeks so that Payette county will be among the honored ones in the state.

He said that the E bond quota can be met if he feels sure that when reports from the Federal reserve bank and other sources where other series bonds are purchased for this county's credit there will be sufficient to put over the county total of \$499,000 of all types of bonds.

This was the first time he said that this county failed to make its E bond quota on an original closing date during any war bond drive, but that this county was third from the top in percentage of bonds made in the state in a report from state headquarters last week.

Victory Crews Do Good Work

Col. Moss was led in his praise of the good work done by the Victory Crews of the county and said they made the following record in various parts of the county:

New Plymouth	\$10,541.85
Prattland	\$7,225.60
Payette	\$6,993.50
Total	\$24,760.95
