BEES NEED BUMBERSHOOTS?

YES NO

They say that "bees never get caught in the rain." Maybe you claim you've seen different. But the changed natural light as a storm approaches is supposed to make bees get busy and fly home. They may be weather-wise or not. But you've simply got to be!—for Spring weather demands an oil change in the car you cannot replace, and Conoco Nth motor oil will give your engine OIL-PLATING for extreme resistance to wear—

like effect that makes metal attract OIL-PLATING—lubricant fastened square in the path of friction. And you can credit the same intensive research with making your OIL-PLATED engine defy corrosion.

Then both worst causes of wear are curbed. And you're safer from lay-ups — junking — walking! Surely Conoco Nth is worth its slight extra cost. OIL-PLATE today. Continental Oil Company

That's really how to hold down carbon, gum and sludge.

That's really how to keep up engine power.

That's really how to get good mileage from your oil and your gasoline.

The special life-giving quality of OIL-PLATING comes from patented Conoco Nth oil's additional ingredient—a climax of notable research. This effort developed the magnet-

IT'S ALL IN THE WAY YOU LOOK AT IT!

(The lines above may look like a mytic maze. But if you close one eye and tilt this page to the position shown, you can easily read four familiar words.)

MAYBE you won't thank us for reminding you of the H C of L. But it doesn't seem nearly so high when you look at it in the light of your electric bill!

Almost alone among household necessities, the price of electricity has not spiraled upward with war. In fact, official government figures* show that the average price of electricity has actually dropped 3.2% since 1939!

That's especially good news now, but it continues a long-time trend. Electric prices have been coming down so steadily that the average American family gets about twice as much electricity for its money today as it did 15 years ago.

If your bill is no smaller, it's because

you're using more electricity to do more jobs than you did then. But the saving is there.

It has been accomplished by America's light and power companies in spite of rising costs and taxes—on top of tremendous war demands for electric service that were met without delay, shortage or rationing.

It was done by efficiency and experience and sound business management—by the same American enterprise which built our nation and on which its future depends.

* Hear NELSON EDDY in "THE ELECTRIC HOUR" with Robert Armstrong's Orchestra. Every Sunday afternoon, 4:30, EWT, CBS Network.
