So the city folks have done it! Well, WATCH OUR SPEED!

WORD comes from Washington that the fat-salvage problem has got to be licked in the small cities, the towns and on the farms.

We women have to save enough used fats in our kitchens to help make munitions, medicines, fabrics, soap for military and civilian use, and many other essentials.

The job, to date, has been done largely by city people, because arrangements for collecting the fats were made in the cities first. And these city folks are turning in more than twelve million pounds a month!

Now we're called on. And will the women on the farms and in the towns and small cities break that record?

Don't worry—just watch our speed!

HOW TO DO IT: Save all used fats in a tin can. Keep it handy to the stove. Scrape your broilers and roasting pans, skim soups and gravies, for every drop counts. Keep solid pieces of fat, as meat trimmings and table scraps, in a bowl.

Melt down once a week when your oven is going, add the liquid fat to the salvage can.

Take the can to your butcher as soon as it's full. He will give you two red points and up to four cents for every pound. If you have any difficulty, call your County Agent or Home Demonstration Agent. This message is approved by WFA and OPA, and paid for by Industry.

La moda Americana...Have a Coke

(THE AMERICAN WAY)

...an American custom as seen in Italy

People overseas are impressed by the American fighting man's friendliness among his fellows. They see his home-ways and customs—his good humor. Have a Coke they hear him say to his buddies, and they begin to understand America. Yes, the pause that refreshes with ice-cold Coca-Cola speaks of the friendliness of Main Street and the family fireside.

We Should All Give President Truman Our Moral Support

Now that President Roosevelt has been laid to rest and a full amount of homage and respect has been paid to him by citizens not only of this country but also throughout the world through press and radio, we should turn our thoughts to President Truman and the tough task he faces to give him all the moral support we can.

Both press and radio have recognized that President Roosevelt's death was most untimely coming as it did, as our country and her allies were beginning the difficult task of working out an organization to bring permanent peace to the world. President Roosevelt had given much thought and study to the project; had been personally in on most of the preliminary contacts to that end with our larger allies, and undoubtedly had within his mind, facts and ideas, recorded no other place that would have helped immeasurably in the final negotiations.

President Truman therefore must start practically from scratch as it were, and it can easily be seen probably faces the toughest job of any American in history. He is our president now and should have the cooperation, moral support and forbearance of us all.

He needs the prayers of us all, that he asked for from newspaper men in his first press conference as president.

We Are Proud Of Our Boss

We, members of the force are indeed proud of our boss, George L. Whorton, publisher of the Independent-Enterprise, as undoubtedly many other Payette people are. The fact that he was chosen as one of eighteen newspaper men in the United States to make a trip to England as guests of the British government, shows the high respect he holds in his profession throughout the country.

Best of all probably is the fact, that his choice for the trip will bring a lot of most favorable advertising and publicity to the city of Payette, because knowing Mr. Whorton as we do, with his heart and soul in the development of Payette, wherever he goes, he will never lose an opportunity to put in a good word and boost for his home town.

We are going to miss him greatly while he is gone, and we are going to appreciate more than we can express, the many gracious offers of help in securing news we have received from friends in order to keep the Independent-Enterprise up to the high standard he has set for it, during his time as publisher.

You And The Editor

May I take a little space to explain something that may not be quite clear to some of our good readers, and news sources. It is a part of the editor's job to determine, not only what is to be printed in the newspaper, but also upon what page it is to be printed. The editor may not always do the best job in making his decisions, but nevertheless that is HIS job.

Folks who turn in news items or information of any kind with a request, and sometimes almost a demand, to "put it on the FRONT PAGE," are running some risk of having their contribution filed in the waste basket. Paid advertisements are not even guaranteed, or promised, any certain position in the paper. On the other hand, you are assured that the editor will try very hard to use his best judgment about all that is to go into the newspaper, and where it is to be placed, keeping in mind, the hundreds of readers.

This may also be a good time to remind some folks, that we are only too glad to help individuals, or organizations, promote some worthwhile program, help organize groups or publicize certain activities, but we believe it is only fair then, that the Herald should be given FIRST consideration on any subsequent news releases.

Before "signing off," may I add that if any individual or organization feels that they are not being given the publicity they deserve—or, have been discriminated against in any way or, have not been treated fairly—or, have lost too much confidence in the editor, they are urged to come in for a visit. You are always welcome, and after all, no one can do anything about such things except you and the editor.—Buhl Herald.

FROM THE FILES

Fifty Years Ago

The following items were taken from the Payette Independent dated April 18, 1895:

The Payette Nursery shipped an other carload of trees to Montana, Monday.

A. B. Moss will make a good chairman of the town council. He was Payette's first mayor and he made a good one.

R. Blon, our popular taxidermist, had another magnificent specimen of his handiwork on exhibition last week. It was a massive pair of horns of a mountain sheep, killed some-where in the mountains of Owyhee.

From up and down the valley comes cheering reports of improvements that are going to make a delightful community of this in a very short time. The sort of boom that is most to be desired is the kind that causes ten trees to grow where one grew before, and that is what is being done in the Payette valley. Be on hand promptly at 8 o'clock Saturday morning and assist in the work of beautifying the town. The day should be made an

occasion of great importance.

We received a pleasant call Wednesday afternoon from Attorney General Parsons, Secretary of State Garrett and Warden Campbell, of the state penitentiary. These gentlemen came down to Payette to purchase trees for an 18 acre orchard on the state prison grounds.

Thirty Years Ago

The following items were taken from the Payette Enterprise dated April 15, 1915:

Owing to an epidemic of measles in the city and vicinity, the Home Product Banquet has been postponed.

I wish to announce to the band boys that I will keep their uniforms pressed this summer, free of charge if they will bring them to the Idaho Dye Works when they need pressing.—C. A. Phetteplace.

Dr. M. A. Brannon, president of the Idaho University at Moscow, spent the latter part of last week in Payette, the guest of H. Harland who is a trustee of the university. Al Dunn, of New Meadows, was
