The electric companies belong to

MAIN STREET

WAR has helped destroy a lot of America's old illusions. The idea that all South Sea beauties look like Dorothy Lamour. The idea that all Englishmen wear monocles and all Russians whiskers. The idea that all electric companies are the exclusive property of a handful of wealthy people.

Actually, few if any other industries are so widely owned. Directly, by many thousands of individual stockholders—housewives, farmers, mechanics, factory workers, teachers. Indirectly, by the millions of savings bank depositors and insurance policyholders—which includes almost every adult American.

Utility securities are popular investments with the banks,

insurance companies and fraternal orders which hold your savings in trust for you. Why? Because cheap, dependable electric service is so basic to your way of life. Because this service is provided by experienced business management.

Wherever you live in America—on Main Street, Park Avenue, or RD No. 1—your money has helped to build the electric industry and you have a large stake in it.
