Here is a Telephone Office Gone to War

An army in the field fights on communications as well as on its stomach. Communications are the backbone of coordination.

Telephone service at home takes many kinds of facilities and as the needs of our fighting men continue to mount, these facilities are impossible to get.

Serious shortages are developing in many localities which prevent us from making installations promptly. We are doing our best to serve as many people as possible and regret any inconvenience that may arise if some installations are delayed. Our first obligation is to meet the needs of war, public health and safety.

* Your continued understanding and cooperation are appreciated.
